Non-Final Office Action

Claims 1-6 are pending. No claim is allowed. Amendments are entered. Acknowledgment is made of the terminal disclaimer and the response filed on 4/28/2005. The previous rejections are withdrawn, as terminal disclaimers have been filed.

The terminal disclaimer was filed for claims 36-41 of DELUCA et al (US Patent No. 5,945,410) and claims 1-20 of DELUCA et al (US Patent No. 6,667,298).

Upon further search and review, two new double patenting rejections have been added.

This application is a division of Application No. 10/127180.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1616

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of DELUCA et al (US Patent No. 6,277,837 B1). Although the conflicting claims are not identical, they are not patentably distinct from each other because presently claimed invention is obvious when R5 is H and R6 is alkyl.

Presently claimed invention is generically taught by the prior art. The method of treating psoriasis, as claimed, is taught by the reference.

It would have been obvious to one skilled in the art to prepare additional compounds useful for the treatment of psoriasis, because the reference teach the uses of these vitamin D compounds substituted at 2 position by an alkyl group. The presently claimed invention 2-substituted methyl would have been *prima facie* obvious to select a methyl from the alkyl group for the same treatment of psoriasis.
